Terms of Service

Last updated: October 16, 2026

These terms govern the use of CirculArte (circularte.edav-tech.com), a web application created by Erick Alvarado. By using it you accept these terms.

What CirculArte is

A free tool that draws images, text and math functions with spinning circles (Fourier series) and records the result as a video. Optionally, it can post those videos to a TikTok account that authorizes it.

Your content

- The videos you create are yours. You can use and share them freely.
- Only use images, logos and text that belong to you or that you have permission to use. You are responsible for the content you upload to the app and for what you post.
- By default, videos include a “CirculArte · edav-tech.com” signature that you can turn off.

Posting to TikTok

If you connect your TikTok account, CirculArte only uploads the videos you create, to your own account. What you post on TikTok is also subject to TikTok's Terms of Service and Community Guidelines. You can disconnect the app at any time from your TikTok settings.

Posting to YouTube

The internal tool “Potter Play Uploader” uses the YouTube API Services to upload original videos to the Potter Play channel and reply to its comments. By using these features you agree to the YouTube Terms of Service, and data is also handled under the

Google Privacy Policy. Access can be revoked at any time from the Google account permissions page.

Acceptable use

Do not use CirculArte to create or spread content that is illegal, misleading, infringes the rights of others, or violates the rules of the platforms where you post it.

No warranties

CirculArte is provided “as is”, without warranties of any kind. It may change, fail or become unavailable at any time. To the extent permitted by law, the author is not liable for damages arising from its use.

Privacy

How data is handled is described in the Privacy Policy.

Changes

We may update these terms; the current version is always the one published on this page.
